INDEX to Volume 75

January, 1988, pages 1-120 **February,** 121-232 **March,** 233-344
April, 345-456 **May,** 457-568 **June,** 569-680

Titles

Ashen Light of Venus, The, *John L. Phillips* and *Christopher T. Russell,* 250
Astrophysics of Suntanning, The, *Bradley E. Schaefer,* 595
Baron and His Celestial Police, The, *Clifford J. Cunningham,* 271
Coloring the Electronic Sky, *Rudolph E. Schild,* 144
Comet Champion, The, *David A. Rosenthal,* 597
Cosmos on Parade, *J. Kelly Beatty,* 359
Diversity among Galaxy Clusters, *Mitchell F. Struble* and *Herbert J. Rood,* 16
Do Black Holes Exist? *Jeffrey McClintock,* 28
Does the Universe Rotate? *Paul Davies,* 599
Epsilon Aurigae: Puzzle Solved? *Alan MacRobert,* 15
Europe's Astronomy Machine, *Richard M. West,* 471
Exploring Mars in 1988, *Jeff D. Beish* and *Donald C. Parker,* 370
Extragalactic Zoo, The, *Ronald A. Schorn,* I, 23; II, 376
Extraordinary Spectral Types, *James B. Kaler,* 149
Fleet Messengers from the Cosmos, *David J. Helfand,* 265
Flowering of Japanese Astronomy, A, *Yoshihide Kozai,* 590
Happy Birthday, Supernova! *Ronald A. Schorn,* 134
How Far Are the Hyades? *Paul Hodge,* 138 (correction, 671)
Hypersensitizing Primer, A, *Alain Maury,* 586
Infrared Astronomy's New Image, *Ian S. McLean,* 254
Journeys on the H-R Diagram, *James B. Kaler,* 482
Of Gravity's Lens and a Fly's Eye, *Richard Tresch Fienberg,* 489
Otto Struve: Scientist and Humanist, *Vladimir Kourganoff,* 379
Phantom in Messier 31, A, *Brian G. Marsden,* 253
Rebirth of a Glass Giant, *Doug Gegen,* 486
SETI: The Search Heats Up, *Donald Goldsmith,* 141
Sky-Gazer's Almanac 1988, 59
Sky in Stereo, The, *William H. Bonney,* 367
U. S. Astronomy in Crisis, *Alan MacRobert,* 469
Window on Our Galaxy's Core, A, *Robin M. Catchpole,* 154

Authors

A. M., see *MacRobert, Alan*
Arp, Halton, The Crucial Assumption about Redshifts, 42
letter, 462
Balbi, Luigi, A Star-Centering Device for Guidescopes, 656
Bales, Ronald M., letter, 6
Barlow, Nadine G., letter, 573
Beatty, J. Kelly, book review, 493
Cosmos on Parade, 359
Beish, Jeff D., A Mars Observer's Guide, 516
Beish, Jeff D., and *Donald C. Parker,* Exploring Mars in 1988, 370
Benton, Julius L., Jr., letter, 239
Bidelman, William P., book review, 382
Bonney, William H., The Sky in Stereo, 367
Bortle, John E., Comet Digest, 112, 224, 334, 450
Comets This Month, 520, 632
Bowman, Fred N., letter, 462
Brandt, John C., letter, 5
Browning, Robert, letter, 462
Buffington, Andrew, An Astrometric Reflector's Pyramidal House, 326
Burbidge, Geoffrey, Anatomy of a Controversy, 40
book review, 38
Byrd, Deborah, The Sun, Moon, and Planets This Month, 64, 178, 290
Cain, Lee, The Telrad Reflex Sight, 148
Carroll, Michael W., book review, 495
Carter, Tom, Astronomy's Reigning CATs and DOGs, 236
Catchpole, Robin M., A Window on Our Galaxy's Core, 154
Colegrove, Richard A., Jr., letter, 126
Cornell, James, book review, 609
Cosell, Bernard, An Off-Axis Guiding Anomaly, 670
Couper, Heather, Where Are All the Women Amateur Astronomers? 4
Crawford, David, The International Dark-Sky Association, 536
Cunningham, Clifford J., The Baron and His Celestial Police, 271
Davies, Paul, Does the Universe Rotate? 599
di Cicco, Dennis, Focal "Plane"? Guess Again, 37
Four Decades of Astrophotography, 556
Notes from the Outback, 444
Dorr, M. Michael, letter, 238
Dunham, David W., An Ideal Pleiades Occultation, 180
Lunar Occultation Highlights for 1988, 68
Planetary Occultations of Stars in 1988, 70
Edberg, Stephen, book review, 276
Ellis, Malcolm H., letter, 461
Evans, James, book review, 277
Ferris, Timothy, letter, 126
Fienberg, Richard Tresch, Of Gravity's Lens and a Fly's Eye, 489
Fraknoi, Andrew, Working Together in Astronomy, 88
Fye, Kenneth Paul, letter, 126
Gauvin, Rod E., letter, 237
Gegen, Doug, Rebirth of a Glass Giant, 486
Gibson, Cynthia, letter, 573
Goldsmith, Donald, SETI: The Search Heats Up, 141
Gordon, Rodger W., Martian Canals: Is Lowell Vindicated? 348
Nine Low-Power Eyepieces, 490
Greulich, B. J., An Off-Axis Scope from Simple Optics, 324
Haley, Paul, Three Fast-Moving Double Stars, 184
Hannenberg, D'Arcy, History Repeats, 197
Harbour, David A., letter, 6
Harrington, Phil, Exploring the Fornax Galaxy Cluster, 109
Hearn, Hank, letter, 126
Helfand, David J., Fleet Messengers from the Cosmos, 265
Heims, H. L., Eavesdropping on Soviet Spacecraft, 648
Henbest, Nigel, Amateurs, Professionals Unite in England, November, 1987; correction to, 536
Hladik, Mark, letter, 5
Hodge, Paul, How Far Are the Hyades? 138 (correction, 671)
see also *Wallerstein, George*
Horne, Johnny, SureSharp — For Crisp Astrophotos, 36
Hostetter, Clyde, letter, 461
Houston, Walter Scott, Deep-Sky Wonders, 114, 227, 338, 451, 562, 674
letter, 349
Humphreys, Roberta M., letter, 5
Hutson, Denise, letter, 573
Jahn, Jost, Setting Circles from a Dot-Matrix Printer, 304
Jones, Kenneth Glyn, book review, 157
Joson, I., The Philippine Astronomical Society, 313
Kaler, James B., Extraordinary Spectral Types, 149
Journeys on the H-R Diagram, 482
Kebabian, John S., letter, 349
Keel, William C., book review, 606
Kerola, Dana Xavier, Dark Desert Highways, 534
Knott, M. Leon, Have Hula-Hoops, Will Travel, 544
Kourganoff, Vladimir, Otto Struve: Scientist and Humanist, 379
Kozai, Yoshihide, A Flowering of Japanese Astronomy, 590
Kuiper, Tom, A Refuge for Radio Astronomy, 124
Laurance, Robin J., letter, 239
Lazerson, Howard E., M.D., Putting a Star Atlas on Rollers, 658
Leiker, Steve, How To Half-Step a Stepper Motor, 80 (correction, 418)
Levy, David H., book review, 608
StarTrails, 91, 316, 428
Lo Guirato, June, letter, 239
Lovi, George, Rambling Through the Skies, 57, 175, 287 (correction, 622), 399, 511, 621
Maclean, A., letter, 349
MacRobert, Alan, The Brightest Quasar, 294
Epsilon Aurigae: Puzzle Solved? 15
The Light Echo of Supernova 1987A, 183
A Summer Evening Star-Hop, 603
The Sun, Moon, and Planets This Month, 402, 514, 628
U. S. Astronomy in Crisis, 469
Vesta among the Winter Stars, 72
Maley, Paul D., The Chinese Ring Eclipse, 222
Mallama, Anthony, letter, 125
Marché, Jordan D., II, A Lensless-Wright Camera, 432
Marcialis, Robert L., letter, 6
Marsden, Brian G., book review, 496
A Phantom in Messier 31, 253
Maury, Alain, A Hypersensitizing Primer, 586
letter, 238
McClintock, Jeffrey, Do Black Holes Exist? 28
McCombs, Douglas A., Joys of a 10-inch Binocular Telescope, 215
McIntosh, Patrick S., book review, 384
McLean, Ian S., Infrared Astronomy's New Image, 254
McMillan, James A., letter, 573
Meeus, Jean, Nighttime Occultations of Venus, 195
Meisel, David D., and *Charles H. Recchia,* A Low-Cost Video Frame Grabber, 526
Melillo, Frank J., letter, 350
Meredith, Dennis, book review, 493
Milton, Daniel J., book review, 274
Morales, Ronald J., The NGC 5353 Galaxy Group, 332
Morel, Philippe, Drawing the Sun and Moon, 404
Mosier, Beverly, You're an Astronomer? What's Your Sign? 460
Mosley, John, Review Corner, 83, 306, 528
Nelson, Jerry, letter, 237
Oberg, James E., UFO's in the Mind's Eye, 572
Oler, Robert G., letter, 126
O'Meara, Stephen J., Tales from the 6th Grade, 424
Osczevski, Randall J., letter, 238
Ottewell, Guy, book review, 157
Parker, Donald C., see *Beish, Jeff D.*
see also *Reynolds, Michael*
Phillips, James H., M.D., letter, 238
Phillips, John L., and *Christopher T. Russell,* The Ashen Light of Venus, 250
Piccirillo, John, letter, 125
Piini, Ernie, and *Joe Shrock,* Experimenting in the Outback, 445
Potter, Harry I., letter, 125
Raab, Herbert, Predicting Eclipses of the Moon, 640
Radloff, Max Paul, letter, 461
Ravneberg, Ronald L., A 17½-inch Dobsonian — Doing It Right, 96

Weber, Joe, letter, 350
Wehrle, Ann E., letter, 574
West, Richard M., Europe's Astronomy Machine, 471
Whitaker, Ewen A., letter, 574
Whitney, Rolla V., letter, 239
Wile, David S., A Novel Finder, 217
Wirz, Paul, letter, 349

Departments and Features

Amateur Astronomers —
AAVSO Nova Awards, 539
Amateurs, Professionals Unite in England, November, 1987; correction to, 536
Calendar of Events, 538
Conversation with Father Heyden, A, 315
Dark Desert Highways, 534
Eavesdropping on Soviet Spacecraft, 648
International Dark-Sky Association, The, 536
International News, 206, 650
News Across the Nation, 204
Philippine Astronomical Society, The, 313
StarTrails, 91, 316, 428
Tales from the 6th Grade, 424
This Year in Victoria, 89
U. S. News, 317
Winter and Spring Meetings, 205
Working Together in Astronomy, 88
Astronomical Computing —
Astronomical Clock Display, 196
Galileo and Uranus, 194
History Repeats, 197
Hotline for Time Signals, 642
How To Half-Step a Stepper Motor, 80 (correction, 418)
Low-Cost Video Frame Grabber, A, 526
Naval Observatory *Almanac for Computers*, 194
Nighttime Occultations of Venus, 195
Ocean Tides, 195
Outer-Planet Satellites, 527
Predicting Eclipses of the Moon, 640
Review Corner, 83, 306, 528
Setting Circles from a Dot-Matrix Printer, 304
Simulating a Mountain's Shadow, 416
Topping the Benchmark, 196
Backyard Astronomy —
Collimating Your Telescope — I, 259; II, 363
Daytime Quick-Check, 262
Summer Evening Star-Hop, A, 603
Books and the Sky —
Analysis of Starlight, J. B. Hearnshaw, 382
Anatomy of a Controversy, 40
Astronomy and the Imagination. A New Approach to Man's Experience of the Stars, Norman Davidson, 608
Atlas of Galactic Nebulae, Part II, Thorsten Neckel and Hans Vehrenberg, 157
Briefly Noted, 159, 278, 387, 497, 611
Catalogue of Southern Peculiar Galaxies and Associations, A, Vols. 1 and 2, Halton C. Arp and Barry F. Madore with William E. Roberton, 606
Coon Mountain Controversies, W. G. Hoyt, 274
Crucial Assumption about Redshifts, The, 42
Cycles of Fire, William K. Hartmann and Ron Miller, with Pamela Lee and Tom Miller, 495
Discovery of Quasars, The, 38
Early Astronomy: From Babylonia to Copernicus, W. M. O'Neil, 277
First Light: The Search for the Edge of the Universe, Richard Preston, 493
Looking Back: Amateur Adventures with Halley's Comet 1985-1986, David Deskins, 276
Mercury: The Elusive Planet, Robert G. Strom, 493
Meteorite Craters, Kathleen Mark, 274
Movement and Rhythms of the Stars, Joachim Schultz, 157
Orbits for Amateurs with a Microcomputer, Vol. II, D. Tattersfield, 496
Quasars, Redshifts, and Controversies, H. Arp, 38
Sun and Earth, Herbert Friedman, 384
Symbiotic Universe, The: Life and Mind in the Cosmos, George Greenstein, 609
Celestial Calendar —
Brightest Quasar, The, 294
Bright Galactic "Monster," A, 292
Calendar Notes, 74, 185, 295, 407, 519, 632
Comets This Month, 520, 632
Drawing the Sun and Moon, 404
Guide to Saturn's Moons, A, 630
Ideal Pleiades Occultation, An, 180
Jupiter's Satellites, 64, 178, 290, 402, 628
Light Echo of Supernova 1987A, The, 182
Lunar Occultation Highlights for 1988, 68
Mars Observer's Guide, A, 516
Mars Watch '88, 518
Massalia, Nysa, and the Crab, 295
Moonwatcher's Corner, 74, 185, 294, 408, 521, 633
1988 Planet Preview, A, 66
Planetary Occultations of Stars in 1988, 70
S and U Coronae Borealis, 631
Sun, Moon, and Planets This Month, The, 64, 178, 290, 402, 514, 628
Three Fast-Moving Double Stars, 184
Vesta among the Winter Stars, 72
50 and 25 Years Ago, 6, 153, 252, 381, 492, 574
Focal Point —
Astronomy's Reigning CATs and DOGs, 236
Martian Canals: Is Lowell Vindicated? 348
Refuge for Radio Astronomy, A, 124
UFO's in the Mind's Eye, 572
Where Are All the Women Amateur Astronomers? 4
You're an Astronomer? What's Your Sign? 460
Front-cover photographs —
Galaxy-Quasar Link? 1
Meteor Crater in Arizona, 233
Omega Nebula, 121
Solar Eclipse Treat, 569
Southern-Sky Splendor, 457
Twilight Tango, 345
Gleanings for ATM's —
Astrometric Reflector's Pyramidal House, An, 326
CCD's and the Amateur, 546
Double-Arm Barn-Door Drive, The, 213
Have Hula-Hoops, Will Travel, 544
Joys of a 10-inch Binocular Telescope, 215
Lensless-Wright Camera, A, 432
Novel Finder, A, 217
Off-Axis Math, 325
Off-Axis Scope from Simple Optics, An, 324
Optical Bench Talk, 100, 547
Putting a Star Atlas on Rollers, 658
17½-inch Dobsonian, A — Doing It Right, 96
$6 Watch Beats Harrison's Chronometer, A, 658
Star-Centering Device for Guidescopes, A, 656
Images, 34, 248, 366, 584
Letters, 5, 125, 237, 349, 461, 573
News Notes —
Are Supernova Remnants Barrel Shaped? 241
Arp 227 and Its Ilk: Shells Without Mergers? 244
Astronomer for a Day, 464
Astronomy Express, 14, 133, 247, 358, 468, 583
Awaiting an Eye, 577
Bigger Ring for Lyra, A, 131
Carolyn Tops Caroline in Comet Discoveries, 582
Clumpy Early Universe? A, 128
Cometary Scars on the Moon? 11
Cosmic Carbon: Organic and Inorganic, 581
Cosmic Cause for the Ozone Hole? A, 465
Cygnus Loop Revisited, 577
Deep in the Heart of M31, 467
Disrupting Galactic Jets, 575
Dust Clouds in Globular Clusters, 129
Dwarf Galaxies: Blinded by the Night, 575
Exploding Cometary Ices, 132
Fading Sun, The, 10
Faint Galaxies: Tip of the Iceberg? 245
Feeding a Hungry Galaxy, 352
Finding Black Holes, 240
Fishing for Crabs Without a Line, 243
Fossil Light from the First Stars? 467
Fresh from the Oven, 353
Frosty the . . . Nebula? October, 1987; correction to, 355
Gamma Rays from Supernova 1987A, 466
Geminga Identified, 242
Giant Arcs: Light Echoes or Lensed Galaxies? 7
Giant Starspots on Lambda Andromedae, 465
Halley Rotation Update, 575
Harvard's New Scope, 240
Hibernating Novae, 8
How Old Is the Milky Way? 463
HST Crew Selected, 582
Hydrogen in the Ring: An Infrared View, 130
Infant Galaxies Found? 351
Infant *O* Stars, 351
Is the Galactic Center Exploding? 10
IUE: A Decade of Science in Orbit, 357
Jupiter-Io Connection, The, 127
Keeping the Sky Safe for Astronomy, 579
La Palma's Giant Telescope, November, 1987; correction to, 355
Largest Gamma-Ray Observatory Nears Completion, 8
Largest Supercluster Galaxy Complex? The, 127
Magellan's Radar OK, 13
New Giant Telescope for Spectroscopy, 129
New Light on Hoag's Object, 13
New X-ray Imaging Telescope, 246
NTT Takes Shape, 464
Of Whirlpools, Warps, Bubbles, and Jets, 9
Orion's Radio Zoo, 463
Phobos Plaque, 576
Pulsar Magnetosphere Resolved, 466
Pulsating *Ap* Star, A, 244
Redshift Record Shattered, 12
Remote-Control Telescopes, 13
Rise and Fall of Comet Halley, The, 132
Signs of a Supercluster in Quasar Spectra, 131
Solar Flares Like To Cluster, 240
Spinning Stars: The Age Connection, 356
Spinning Stars: The Color Connection, 356
Sun Not Shrinking, 581
Sunspot-Weather Link Found, 243
Super Star Acts Up, 578
Triton's Mysterious Surface: Solid or Slushy? 580
Tycho's and Kepler's Supernovae 400 Years Later, 577
Vela's Runaway Pulsar, 355
Venus Future: Terraforming? 354
Venus Past: Wet or Dry? 352
Venus Present: Tectonic Activity? 354
What Is SN 1987J? 357
Observer's Page —
Chinese Ring Eclipse, The, 222
Comet Digest, 112, 224, 334, 450
Deep-Sky Wonders, 114, 227, 338, 451, 562, 674
Experimenting in the Outback, 445
Exploring the Fornax Galaxy Cluster, 109
Four Decades of Astrophotography, 556
Gallery, 336, 448, 560, 672
Hypered Film for Planetary Photography, 668
NGC 5353 Galaxy Group, The, 332
Notes from the Outback, 444
Observers' Notebook, 111, 671
Off-Axis Guiding Anomaly, An, 670
Sunspot Numbers, 115, 228, 340, 452, 564, 675
Why Am I Here? 447
Rambling Through the Skies —
Belt of Orion, The, 57
"Improving" the Constellations, 399
Magnitude Enlightenment, 287 (correction, 622)
Reaching for Centaurus, 621
Sirius Talk, 175
Twilight — Starring Mercury and Venus, 511
***S&T* Test Report —**
[illegible] Low-Power Eyepieces, 490
SureSharp — For Crisp Astrophotos, 36
Telrad Reflex Sight, The, 148
Three Collimating Tools, 264
Southern Stars for . . . (current months), 174, 398, 620
Stars for . . . (current month), 58, 176, 288, 400, 512, 622

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books and the Sky is ordinarily indexed only under the Departments and Features section.

Amateur activities: in Alps, 650; amateur-professional cooperation, 88; Andrus Planetarium renovation, 204; ASP-AL-ALPO-WAA meeting, 88; "Astronomer for a Day" program, 464; in Austria, 651; beginning in astronomy, 91; in Canada, 650; and CCD's, 546; *Comet Rapid Announcement Service*, 317; dark-sky search in California, 534; deadline extension for Hubble Space Telescope proposals, 206; finding moons of Uranus and Neptune, 317; Finland eclipse plans, 650; fireball over Oregon, 204; French observatory, 651; Germany's *Skyweek*, 650; in Hawaii, 204; Hawaiian observatory plans, 206; illuminated star map, 650; ink test, 204; in Iran, 206; listening to Soviet spacecraft, 648; Christa McAuliffe memorial, 205; meeting of meteor observers, 651; Mir hotline, 318; in North Dakota, 317; nova and supernova awards, 539; Parkland College Planetarium opens, 204; in the Philippines, 206, 313; photography workshop in Australia, 444; in the Sahara Desert, 207; saving Mount Wilson, 204; 6th graders' constellations, 424; John Tebbutt's memoirs, 651; women amateurs, 4, 573

Art: of MariLynn Flynn, 354; of William Hartmann, 495; of Pamela Lee, 496; of Ron Miller, 496

Asteroids (minor planets): Chiron brightens, 358, 583; first discoveries of, 271; 20 Massalia, 295; 44 Nysa, 295; photographic plates moved, 14; seeking satellites of, 350, 468; selection for Galileo flyby, 133

Astrometry: distance to Hyades cluster, 138, 237; final tests on Hipparcos, 358

Astronomical constants: solar constant, 11

Atmospheric phenomena: mountain shadows, 416; polar stratospheric clouds, 465

Bioastronomy: development of life on Earth, 141; search for extraterrestrial intelligence, 141

Black holes: see ***Collapsed objects***

Celestial mechanics: finding distances with moving-cluster method, 140

Chemistry: carbon in meteorites and nebulae, 581; cause for ozone hole, 465, 596; on Triton's surface, 580

Collapsed objects: black holes, 28, 240; Geminga as pulsar, 242; magnetic field of PSR 1237 +25, 466; pulsar-brown dwarf binary, 468; Vela pulsar, 355; white dwarfs, 29, 175, 485

Comet Halley: 450; book looking back, 276; light curve, 132; photographic archive, 5; rotation of, 575

Comets (see also ***Comet Halley***): Borrelly (1987p), 112, 226, 334; Bradfield (1987s), 112, 206, 226, 334; William Bradfield interview, 597; as cause for ozone hole, 465; *Comet Rapid Announcement Service*, 317; discoveries by women, 582; exploding ices on, 132; Furuyama (1987f$_1$), 224, 334; Ichimura (1987d$_4$), 224; Levy (1988e), 468; Liller (1988a), 334. 450, 520, 632; McNaught (1987b$_1$), 112, 224, 334, 450; minicomets hitting inner solar system, 133; Rudenko (1987u), 226; scars on Moon from, 11; splitting of Comet Wilson, 358; Tempel 2 (1987g), 520, 632

Computing: astronomical clock display, 196; CCD's for the amateur, 546; inexpensive image-processing system, 526; National Bureau of Standards time signals, 642; predicting lunar eclipses, 640; printing setting circle scales, 304; Savage benchmark, 196; simulating mountain shadows, 416

Conjunctions: Moon and Venus, 345; Saturn and Uranus, 584

Constellation study: Centaurus-Crux region, 621; Orion's belt, 57; H. A. Rey's patterns, 399

Cosmic background radiation: indications of early stars, 467; irregularities in, 128, 467

Cosmic rays: 265

Cosmology: clumpy early universe, 128; high redshifts, 12, 14, 133, 351; Mach's principle, 599; missing mass in low-surface-brightness galaxies, 245; redshift controversy, 38, 40, 42

Dark matter: dwarf galaxies as, 575; low-surface-brightness galaxies as, 245

Detectors: infrared arrays, 247, 254

Eclipses:

Lunar: predicting, 640; October 6, 1987, partial, 111

Solar: and solar diameter, 581; May 3, 1715, total, 581; September 23, 1987, annular, 222; March 18, 1988, total, 206, 569; July 22, 1990, total, 650

Education: International Space University, 14; Christa McAuliffe memorial, 205; teaching astronomy, 239, 461, 574; textbook prices, 237

Galaxies: IC 708, 378; IC 4553, 26; M33, 579; M51, 9; M65, 25, 452; M81, 562; M82, 562; M83, 475; M87, 378; M95, 452; M96, 452; M104, 564; M105, 452; NGC 55, 481; NGC 383, 377; NGC 470-4, 244; NGC 613, 481, 607; NGC 1073, 41; NGC 1265, 378; NGC 1316, 109; NGC 1365, 110, 474; NGC 1531-32, 606; NGC 1614, 24; NGC 2442, 478; NGC 2672, 340; NGC 2793, 340; NGC 2832, 340; NGC 2859, 340; NGC 2976, 563; NGC 3077, 564; NGC 3593, 452; NGC 4151, 292; NGC 4214, 145; NGC 4319, 1, 42; NGC 4650A, 26; NGC 4861, 27; NGC 4945, 476; NGC 5128, 377, 575; NGC 5296, 39; NGC 5533, 674; NGC 5600, 674; NGC 5660, 675; NGC 5665, 674; NGC 5676, 675; NGC 6090, 24; NGC 6166, 17, 23; NGC 6240, 26; NGC 6946, 115; NGC 7232-33, 608; 3C 326.1, 26; capturing gas, 352; Hoag's object, 13; infrared images of forming, 247, 351; numbers of low-surface-brightness, 245; primeval, 351; special classifications of, 16; supernova in NGC 891, 357

Active: Cygnus A, 376; finding a Seyfert, 292; intense star formation in, 247; jets of, 9, 575; M87 (Virgo A), 378; Markarian galaxies, 24; mergers leading to quasars, 247; NGC 5128 (Centaurus A), 377, 575; radio galaxies, 376, 575; starburst galaxies, 25; 3C 310, 377; 3C 345, 378

Clusters of: Abell 154, 20; Abell 370's giant arc, 7; Abell 400, 20; Abell 426, 20; Abell 667, 22; Abell 1097, 21; Abell 1185, 20; Abell 1275, 21; Abell 1371, 21; Abell 1501, 21; Abell 1663, 21; Abell 2019, 21; Abell 2151, 20; Abell 2199, 17; classifying, 16; Coma, 17; cooling flow in, 352; dwarf galaxies in, 575; evolution, 19; Fornax, 109; NGC 5353 group, 332; seen in quasar spectra, 131; Virgo, 16

Interacting: Arp galaxies, 27, 244; in infrared, 258; luminous shell around, 244; peculiar galaxies, 27, 606; ring galaxies, 27

Local Group (see also *Milky Way* and ***Magellanic clouds***): detail of M31's core, 467; first spectrum of M31, 350; M31, 559

Milky Way: age, 463; infrared views of the core, 154, 258

"Normal": dwarf, 575; Leo I, 146; protogalaxies, 27

Superclusters of: largest, 127

Gamma-ray astronomy: exploding galactic center, 10; French ASGAT telescopes, 8; Geminga identified, 242; SN 1987A, 14, 134, 466

Gravitation: gravitational lenses, 7; gravity waves and SN 1987A, 350; microlensing, 489

History: Arcturus lights Chicago exposition, 674; Arp-quasar controversy, 38, 40; astronomy in Japan, 590; canals on Mars, 348; chronometers, 658; Clark refractors, 238, 239, 486; classifying galaxy clusters, 16; cosmic ray studies, 265; discovery of asteroids, 271; discovery of quasars, 38; distance to the Hyades, 138; of European Southern Observatory, 471; first spectrum of M31, 350; Galileo and Uranus, 194; Leonid meteor-shower woodcut, 349; lost moons of Saturn? 349; Phobos discovery, 576; Sirius, 175; Soviet astronomy, 379; Soviet space achievements and memorials, 359; start of astronomical journals, 271; total solar eclipse of 1715, 581; women comet discoverers, 582

Image processing: CCD's, 144; low-cost system, 526

Infrared astronomy: core of the Milky Way, 154; detector arrays, 247, 254; finding brown dwarfs, 14; forming galaxies, 247; Triton's surface chemistry, 580; views of Ring nebula, 130

Light pollution: 579; International Dark-Sky Association, 536; and Palomar Observatory, 350

Magellanic clouds: studies at European Southern Observatory, 478; youngest *O* stars in, 351

Meteorites: carbon in, 581; Meteor Crater, 274

Meteors: fireball over Oregon, 204; Leonid meteor-shower woodcut, 349; observers meet in Belgium, 651

Millimeter and submillimeter astronomy: new 1.2-meter dish at Harvard, 240; seeing earliest stars, 467

Molecules: resilient carbon, 581

Moon: Aristarchus, 34; comet scars on, 11; domes on, 238; drawing, 404; protecting radio astronomy on dark side of, 124

Nebulae: carbon in, 581; radio features in M42

Bright: Cocoon, 145; Cygnus Loop, 146; Horsehead, 58, 114; IC 468, 228; light echo of SN 1987A, 182; M1 (Crab), 30; M8 (Lagoon), 584; M17 (Omega), 121, 479, 558; M20 (Trifid), 146, 584; M42 (Orion), 57, 256, 463; NGC 2244 (Rosette), 248; NGC 2359, 228, 675; NGC 6334, 479; NGC 6888, 557; North America, 366, 559; Orion nebula in infrared, 256; Sharpless 2-82, 604; VdB 126, 604; youngest stars in Tarantula, 351

Planetary: 150, 338, 485; Abell 12, 338; Abell 33, 339; carbon emission in, 581; Haro 3-75, 338; Jones 1, 339; Kohoutek 1-7, 338; Kohoutek 2-1, 338; M25 (Dumbbell), 605; M57 (Ring), 130, 131; Minkowski 1-18, 338; NGC 40, 151; NGC 1501, 151; NGC 2438, 228; NGC 2440, 151; NGC 4361, 564; NGC 6905, 151; NGC 7027, 257; Sanduleak 2-21, 339

Neutron stars: see ***Collapsed objects***

Novae: 149; V603 Aquilae, 149; DQ Herculis, 150; "hibernating," 8; missing, 133; WY Sagittae, 9; CK Vulpeculae, 9

Observatories (amateur and public): Bercé in France, 651; Douglas C. Coleman Memorial, 318; Cristo Rey, 206; Charles E. Daniel, 486; Hula-Hoop, 544; possible in Hawaii, 206

Observatories (professional): Astrophysics Research Consortium, 133, 583; European Southern, 13, 133, 471; funding crisis for national observatories, 358, 469, 583; Harvard, 240; Hopkins' 150th year, 583; in Japan, 590; Mount Wilson, 204; Palomar and light pollution, 350; Smithsonian Astrophysical, 133; Steward, 353; Whipple, 353

Observing techniques: brightness intensity scales, 239; Cassegrains for planetary work, 6; drawing the Sun and Moon, 404; star-hopping, 605; using color filters, 374, 375; viewing Mars, 370, 516

Occultations: Pleiades by the Moon, February 23, 1988, 180; rarity of Venus occultations, 195

Optics: active optics, 476; collimating telescopes, 259, 264; curved focal surface, 37; lensless-Wright camera, 432; low-power eyepieces compared, 490; stability of low-expansion glass, 100

Organizations: American Astronomical Society, 464; Astronomical Society of the Pacific, 88; International Dark-Sky Association, 536; Planetary Society, 142

People: Arp, H. C., 38; Bradfield, W., 597; Custer, C. P., Jr., 556; Drake, F., 141; Gagarin, Y. A., 362; Galileo, 194; Hall, A., 576; Herschel, C., 582; Heyden, F. J., 239, 315; Kardashev, N. S., 143; Lowell, P., 348; Mogley, R., 548; Rey, H. A., 399; Shoemaker, C. S., 582; Struve, O., 379; Tebbutt, J., 651; Tombaugh, C., 316; Tsiolkovskiy, K. E., 359; von Zach, F. X., 271

Photography: black-and-white film characteristics, 586; contest in Australia, 671; curved focal surface, 37; Custer's photographic legacy, 556; hypering, 444, 586, 668; lensless-Wright camera, 432; off-axis guiding problem, 670; *Photo Bulletin* demise, 5; planetary, 668; Southern Hemisphere workshop in, 444; stereoscopic images, 367

Physics: collapsing objects, 28; rotating universe, 599; superluminal velocity, 378

Planetariums: Andrus, 204; Christa McAuliffe memorial, 205; Parkland College, 204

Planets and their satellites: minicomets hitting inner planets, 133

Earth (see also *Moon*): development of life on, 141; and minicomets, 133; tides, 195

Jupiter: effects on Io, 127; Io eclipse and transit, 111; as UFO, 238

Mars: and canals, 348; observing 1988 opposition, 370, 516; Phobos craft, 247, 576; south polar cap, 372; viewing clouds on, 370

Mercury: good apparitions of, 511

Neptune: Triton's surface chemistry, 580

Pluto: and Charon, 6. 247; more moons of? 247

Saturn: conjunction with Uranus, 584; guide to moons, 630; infrared image of, 254; lost moons? 349

Uranus: conjunction with Saturn, 584; Galileo and, 194; infrared image of, 254

Venus: ancient atmosphere of, 352; ashen light, 250, 573; good apparitions of, 511; seeing crescent with naked eye, 461; tectonic activity on? 354;

terraforming, 354; water on, 352

Pulsars: see ***Collapsed objects***

Quasars: controversy, 38, 461; discovery of, 38; formation of, 247; locating 3C 273, 294; Markarian 205, 1, 42; Markarian 231, 247; microlensing, 489; PHL 957 behind infant galaxy, 247; redshift record, 12, 14, 133; spectra shows galaxy supercluster, 131

Radio astronomy: Centaurus A, 377; Cygnus A, 376; Cygnus Loop, 577; detecting a pulsar's magnetosphere, 466; features in Orion nebula, 463; galaxies, 376; in Japan, 590; Kepler's supernova, 578; on Moon's far side, 124; possible pulsar-brown dwarf binary, 468; SN 1986J, 357; superluminal motion, 378; threats from interference, 379; University of Texas' program moves to Hawaii, 358

Relativity: and black holes, 28; rotating universe, 599

Rocket astronomy: fossil light from first stars? 467; new X-ray imaging techniques, 246

Science policy: astronomers resign, 583; astronomy and the Strategic Defense Initiative, 125, 126, 237; funding crisis at national observatories, 358, 469, 583; Japanese astronomy, 594

Space-based astronomy: amateurs and the Hubble Space Telescope, 206; astrometry and Hipparcos, 358; Cosmic Background Explorer, 467; cosmic-ray detection, 270; future infrared telescopes, 258; new X-ray imaging techniques, 246; solar maximum effects on, 239, 468; Solar Maximum Mission, 10; Supernova 1987A from Ginga and Mir, 14, 136, 247; Tycho's supernova in X-rays, 577; ultraviolet, 357

Spacecraft: Advanced X-ray Astrophysics Facility funded, 247, 583; Comet Rendezvous Asteroid Flyby, 247; Cosmic Background Explorer, 467; EXOSAT, 577; Galileo, 133; Ginga, 14, 136, 247; Hipparcos, 358; Hubble Space Telescope, 14, 206, 239, 468; Infrared Space Observatory, 258; International Ultraviolet Explorer, 357; listening to Soviet, 648; Luna 24, 360; Lunakhod 2, 360; Magellan, 13; Mir, 14, 136, 261, 649; Mir hotline, 318; naming new Space Shuttle, 650; Phobos, 247, 361; Pioneer Venus, 250; Solar Maximum Mission, 10, 137; Space Infrared Telescope Facility, 258; Space Shuttle schedule, 468; Sputnik 2, 361; as UFO's, 572; Venera 13, 361

Space debris: French space art project, 358

Space policy: astronomy and the Strategic Defense Initiative, 125, 126; Australian launch site, 358; European Space Agency programs, 14; Hawaiian launch site, 133, 358; NASA's 1989 budget, 247

Star clusters:

Associations: Zeta Persei, 58

Globular: dust clouds in, 129; M4, 675; NGC 362, 129; Omega Centauri, 564

Open: ages of stars in, 356; distance to Hyades, 138, 237; low-mass stars in Hyades, 356; Harvard 20, 605; M44 (Beehive), 339; M46, 227; M47, 227; M71, 605; missing NGC 2394, 227; NGC 2423, 228; NGC 2425, 228; NGC 6800, 604; NGC 6802, 604; NGC 6939, 115; Pleiades, 114, 356

Stars: age and rotation, 356; brown dwarfs, 14; combination spectra, 152; evolution, 483; extraordinary types, 149; extrasolar planets, 14, 141; fossil light from stars, 467; H-R diagram, 482; neutron stars, 30; *P* and *Q* spectral classes, 149; radioactive dating and age of Milky Way, 463; rotation and low-mass, 356; subdwarf *O*, 152; white dwarfs, 29, 175, 485; youngest as *O* stars, 351

Double and multiple: A0620 −00, 31; 36 Andromedae, 184; Zeta Cancri AB, 184; Castor, 184; Beta Cygni, 604; Cygnus X-1, 32; fast-moving, 184; HD 27130, 140; HD 27149, 140; LMC X-3, 32; Sirius, 29, 175, 227; X-ray binaries, 31

Individual: Z Andromedae, 153; Eta Carinae, 152; CH Cygni, 153; Alpha and Beta Sagittae, 605; Struve 2525, 604

Variable: Epsilon Aurigae, 15; S and U Coronae Borealis, 631; U Geminorum, 150; luminous blue, 578; rapidly oscillating *Ap*, 244; starspots on Lambda Andromedae, 465; Variable C in M33, 578; Z Vulpeculae, 604

Sun: determining size from total eclipse, 581; drawing features, 404; effects of solar maximum on spacecraft, 239, 468; flares and "hot spots," 240; inner core, 385; solar constant, 11; sunspot-weather link found, 243; suntanning, 595; ultraviolet radiation, 595

Supernovae: 152, 485; automated searches, 6; false alarm in M31, 253; gamma rays and SN 1987A, 466; gravity waves and SN 1987A, 350; light echo, 468; pulsar in Vela remnant, 355; radio, 357; remnants, 30, 241, 243, 355, 480, 577, 578; SN 1986J, 357; SN 1987A, 14, 135, 182, 247, 466, 468; Type V, 357

Telescope making: center-focusing binoculars, 548; collimation, 259, 264, 363; crosshairs from spider cocoon, 100; differential screw, 548; double-arm barn-door drive, 213; first mirror element of Keck telescope cut, 133; first spun-cast mirror, 133, 353; guiding-eyepiece enhancer, 656; miniature finder using a beamsplitter, 237; off-axis guiding problem, 670; off-axis reflector, 325; polar alignment in the Southern Hemisphere, 444; Sonotube sealer, 548; stability of low-expansion glass, 100; stepper motors, 80, 418; strippable coatings, 547

Telescopes (amateur): Burlington's 12-inch astrometric reflector, 326; Custer's 12½-inch Springfield-mounted reflector, 556; Greulich's 5-inch off-axis reflector, 325; Marché's 8-inch lensless-Wright camera, 432; McCombs' 10-inch binocular Newtonian, 215; Ravneberg's 17½-inch Dobsonian, 96

Telescopes (professional): 12-inch refractor at Lick, 239; 18½-inch refractor at Northwestern University, 238; 23-inch refractor in South Carolina, 486; 36-inch Crossley reflector at Lick, 382; 1.2-meter radio dish at Harvard, 240; 3.5-meter ARC, 577, 583; 3.58-meter New Technology Telescope, 464; 4.2-meter William Herschel, 671; 10-meter Keck telescope, 133, 237; 26-meter META telescope, 143; automatic photoelectric, 358; remote control, 13; Spectroscopic Survey Telescope, 129; Very Large Telescope, 133, 471

Timekeeping: accuracy of quartz watch, 658; chronometers, 658; Julian dates, 59; National Bureau of Standards time signals, 642; time corrections, 59

Ultraviolet astronomy: International Ultraviolet Explorer, 357

Very large-scale structure: Pisces-Cetus supercluster complex, 127

Vision: stereoscopic photographs, 367

X-ray astronomy: binaries, 31; imaging with multi-layer coatings, 246; SN 1987A, 14, 134, 247; Tycho's supernova, 577

Ash Domes have been recognized internationally by major astronomical research groups, universities, colleges, secondary and primary schools for their performance, durability and dependability. Mechanical or electrical dome and shutter drives in sizes from ten to 36 feet in diameter; sensibly priced.

FOCUS ON

COLUMBIA UNIVERSITY MILLIMETER-WAVE SKY SURVEY PROJECT Cerro Tololo Inter-American Observatory, Chile

The 48-inch millimeter-wave telescope was installed at Cerro Tololo Inter-American Observatory and saw first light in December of 1982.

Its large-scale survey observations of molecular clouds in the southern sky have already revealed much new information on Milky Way structure and on the makeup of our nearest galactic neighbors, the Magellanic Clouds.

The photo taken at 2,200 meters elevation at Cerro Tololo shows the specially made wide-slit dome, the surface of the telescope dish, the building, and snow remaining on mountains in the Dona Ana range, with peaks to 6,000 meters.

Photo by Joe Montani
